

Structure of a Data Science Project

Quiz, 4 questions

1
point

1. What are the two stages in which a data science project might *start*? Select all that apply.

- ☐ Interpretation
- ☐ Report writing
- ☒ Exploratory data analysis
- ☒ Defining/stating the question

1
point

2. Which part is NOT part of the data analysis process?

- ☐ Formal modeling
- ☐ Exploratory data analysis
- ☐ Communication
- ☒ Decision-making

1
point

3. What are the two goals of exploratory data analysis? Select all that apply.

- ☒ Determine if the data are suitable for the question
- ☒ Sketch an answer to your question.
- ☐ Assess the totality of the evidence regarding your question.
- ☐ Build presentations for communicating results to people outside your organization.

point

4. An analyst on your team engages in exploratory data analysis of a dataset. The EDA inspires him to ask a new question about the data so he begins the data analysis process on this same dataset and goes through the 5 phases.

What is wrong with this approach? Select all that apply.

- ☒ The development of the question and the development of the answer to the question were conducted with the same dataset.
- ☐ Exploratory data analysis should never come before defining the question
- ☐ Exploratory data analysis was used to generate a new question.

☒ I, **Marin Sarbulescu**, understand that submitting work that isn't my own may result in permanent failure of this course or deactivation of my Coursera account.
