

Module Quiz

Quiz, 3 questions

1
point

1. What is the key difference between supervised and unsupervised models?

- ☐ Unsupervised models need fewer data points for accurate modelling as compared to supervised learning
- ☒ Supervised models learn to predict based on known labels whereas unsupervised models are more concerned with discovering patterns in the dataset
- ☐ Unsupervised learning requires even more labeled training data since the model is less controlled during training
- ☐ Supervised models are better for prediction than unsupervised because the label is known
